

## Specs

- ⚡ 9Nm peak torque
- ↕ 150mm travel
- 🚗 250mm/s acceleration
- 📦 Moves effortlessly +300kg

## Motion Ranges

- ↕ Heave (Disp/Vel/Accel) 0-150 mm & 250 mm/s
- ↔ Pitch (Disp/Vel/Accel)  $\pm 8^\circ$ ,  $\pm 20^\circ/s$  &  $210^\circ/s^2$
- ↔ Roll (Disp/Vel/Accel)  $\pm 11^\circ$ ,  $\pm 35^\circ/s$  &  $280^\circ/s^2$

## Key Features

- 👁️ Unmatched Realism
- 🎮 Immersive Gameplay
- ⚙️ Quality Meets Affordability
- ∞ Endless Possibilities
- 🎯 Empowered Precision
- 🔗 Expanded Compatibility

## Experience a Revolution in Motion Technology

Get ready to elevate your gaming experience like never before. *Come Over Gaming* and *SHH Simulation* have come together to introduce a groundbreaking 3DOF Motion System that redefines realism and immersion while keeping quality and functionality at the forefront – all at an unbelievably affordable price. Boasts linear functionality, efficiency and effortless connectivity.

Powered by *Thanos Motion Electronics*, the precise motion system signal processing and control elevates the driving experience to new heights of immersion meticulously capturing motion cues replicating every feedback from bumps and road imperfections to accelerations and brakings, replicating all the essential vehicle dynamics. Racing or space flight: It's your choice. Compatible with hundred of games.

With the included *Sim Racing Studio* license, you'll effortlessly harness your full potential. Our product boasts compatibility with a range of leading software such as *Simhub*, *SimTools* and *FlyPT Mover* among others.

There's no limit to where your racing journey can take you. The future of gaming is here, and it's more affordable than ever. Unlock a new era of gaming.
